November 13, 2006

Dear Mr. Peng,

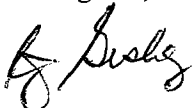

I would like to thank you and your entire BOMESC PMT and organization for the excellent work and strong support that you provided on the Living Quarters and Electrical Buildings which you recently completed for Bohai Phase II Wellhead Platform C. Your entire organization demonstrated the type of cooperative spirit and professionalism that we needed on this challenging project. The Bohai Phase II project is very important to ConocoPhillips China and your team was able to successfully work with us and the other project contractors to deliver what must be the best Living Quarters in Bohai. This was not an easy project and we sincerely appreciate your cooperation and success in completing it on schedule, with high quality and within budget.

Most importantly, I wish to thank and congratulate you and your team for their excellent safety performance throughout the entire project. Safety is a top priority at ConocoPhillips China and your achievement of over one million man-hours without a lost workday injury provided very strong support to our safety efforts and to our objective of sending everyone home safely every day.

As we continue working together on the next facilities for Bohai Phase II (WHP-B), I hope you will contact me directly if I can be of assistance, either on our projects or on other BOMESC projects. In addition, I would be happy to share our experiences with other potential BOMESC clients if you so desire.

Thanks again for your leadership and your project teams performance in providing us with excellent Living Quarters and Electrical Buildings for WHP- C. We are confident that you will successfully execute an equal or better project on WHP-B.

Best regards,

Richard J. Geshay
Vice President, Capital Projects
ConocoPhillips China, Inc.
